

# Altenar Data Feed Export

*Reference Manual & Integration Guide*

## Overview

**XML Feed** – The current “feed” is a programmatic data service is intended to be available to Altenar b2b licensees, to be used for their marketing or promotional purposes, or any other operator supporting activity that does not include ability to make or receive a wager on a sports bet. This would be the functionality covered by Altenar Sports Betting system, that is the source of the data provided through this API. Furthermore, data available via this programmatic interface is provided in accordance to the software licensing agreement that operators enter into with Altenar, as well as it extends the obligations towards third parties that are the respective IP rights owners for the data that may be contained within this feed. In order to ensure the access to this data is controlled, white-listing by IP is mandatory and an indication of IP ownership is required when Operators request such white-listing to be performed..

**Importer Id** – Unique operator id for segregation of licensee brands (the value is assigned at integration stage) and is unique to each operator that has a business relationship with Altenar

## Supported Data Formats

Service provides data in two formats XML and JSON

For XML format the following header should be set in request:

**Content-Type:** application/xml

**Accept:** text/xml

By default, if no headers are set, the response will be in JSON format

## Available Service Methods

Method Name	URL/Description
GetEvents	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1</a> Information of pre-match events for the current day
GetLiveEvents	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetLiveEvents?importerId=1">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetLiveEvents?importerId=1</a> Information of live events for the current day
GetEventDetails	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventDetails?importerId=1&amp;eventId={eventId}">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventDetails?importerId=1&amp;eventId={eventId}</a> Detailed information of a single event
GetEventResults	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventResults?importerId=1">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventResults?importerId=1</a> Information of a single pre-match event results and for any event (pre-match and live) in UOF import
GetMarkets	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetMarkets?importerId=1&amp;eventId={eventId}">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetMarkets?importerId=1&amp;eventId={eventId}</a> Information about markets and odds for a single event
GetSports	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetSports">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetSports</a> A complete list of sport names and their Ids in Altenar Sportsbook

## Odds URLs and Configuration Patterns

Service provides information for pre-match and live events (odds format - decimal)

Scenario	URL Pattern
Data retrieval for pre-match events for the current day.	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1</a>
Data retrieval for live events for the current day.	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetLiveEvents?importerId=1">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetLiveEvents?importerId=1</a>
Data retrieval for a single event	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetMarkets?importerId=1&amp;eventId={eventId}">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetMarkets?importerId=1&amp;eventId={eventId}</a>
SportId, CategoryId, ChampionshipId parameters can be included in events requests (GetEvents and GetLiveEvents). The service provides the ability to request data with listed parameters in any combination, the absence of any of this parameters is also allowed.	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1&amp;sportid={sportId}&amp;categoryId={categoryId}&amp;championshipId={championshipId}">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEvents?importerId=1&amp;sportid={sportId}&amp;categoryId={categoryId}&amp;championshipId={championshipId}</a>
Deep linking pattern Service provides the detailed information of event	<a href="https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventDetails?importerId=1&amp;eventId={eventId}">https://dataexport-uof-altenar-stage.biahosted.com/Export/GetEventDetails?importerId=1&amp;eventId={eventId}</a>

## Sports ids Table

Sport Name	Sport ID	Sport Name	Sport ID
Soccer	1	Baseball	13
Horse racing	2	Cycling	14
Greyhounds	3	Golf	15
Tennis	4	Ice Hockey	16
Rugby	5	Handball	17
Snooker	6	Floorball	18
Motor sport	7	Volleyball	19
GAA	8	Football	20
Darts	9	Winter sports	21
Boxing	11	Bandy	22

Basketball	12	Nordic Combined	47
Futsal	23	Swimming	37
Curling	25	Alpine	38
Aussie rules	26	Cross Country Skiing	39
Waterpolo	27	MMA	40
Athletics	28	Ski Jumping	41
Cricket	31	Freestyle Skiing	42
Australian Football	32	Biathlon	43
Beach volley	33	Bobsleigh	44
Table Tennis	34	Luge	45
Badminton	35	Figure Skating	46
Short Track Speed Skating	48	Track Cycling	59
Speed Skating	49	Fencing	60
Skeleton	50	Wrestling	61
Snowboarding	51	Archery	62
Rowing	52	Beach soccer	63
Sailing	53	Bowls	64
Taekwondo	54	E-Sports	66
Gymnastics	55	Squash	69
Speedway	56	Olympics	78
Canoeing	58	Soccer Specials	80
Field hockey	81		

Note that complete actual list of sports and their according ids can be achieved by GetSports method.

## Supported Market Types

The markets set can be configurable per operator.

TypeID	Market Name
1	1x2
10	Double chance
11	Draw no bet

14	Handicap {hcp}
16	Handicap
18	Total
29	Both teams to score
186	Winner
187	Game handicap
189	Total games
219	Winner (incl. overtime)
223	Handicap (incl. overtime)
225	Total (incl. overtime)
237	Point handicap
238	Total points
251	Winner (incl. extra innings)
258	Total (incl. extra innings)
314	Total sets
327	Map handicap
340	Winner (incl. super over)
493	Frame handicap
534	Championship free text market
535	Short term free text market
536	Free text multiwinner market
538	Head2head (1x2)
539	Head2head
559	Free text market

## Deep linking considerations

When initializing AltenarSportsbook, idBet values can be added with the initial parameter “betslipOddIds”:

```
params.betslipOddIds = [62723764, 62808207]

var altenarSB = new AltenarSportsbook ('# div', params)
```

Here AltenarSportsbook will be initialized with two betslips bets. If the user has saved bets from the previous session locally, they will be reset.

You can also add bets to betslip dynamically. To do this, the existing “AltenarSportsbook” object must call the “setParam” method. For example:

```
altenarSB.setParam ('betslipOddIds', [62723764, 62308207])
```

When calling this method, two bets will be added to user’s betslip. Previous bets that have been added to betslip will not be deleted.

(for further reference see Altenar New Frontend Integration Guide page 4)
